Pool Chemicals			

Additional Notes:

---

---

---

---

## **Exit Obstructions**

- Check panic hardware
- Check swing direction/flow, making sure they open fully and are not obstructed on either side
- Check locks as to whether they are locking properly
- Make sure equipment is not obstructing an exit

## **Floor Surfaces**

- Check for slip and fall surfaces, cracked tiles, and areas that require non-slip surfacing
- Check for adequate signage used when floors are slippery

## **Bathing Load**

- Posted in Lifeguard area for all pools.

## **Glass/Mirrors**

- Check for broken windows/glass
- Make sure interior display cases are using a tempered glass, rather than ordinary glass
- Check mirrors for cracks and security

## **Stairs/Ramps**

- Adequate slip protection is provided/required
- Handrails are provided (continuous and extend the entire distance of the stairs/ramp)

## **Storage/Equipment Rooms**

- Storage of equipment is safe and items are secure

## **Washrooms/Change Rooms**

- Washroom cleaning logs are up to date
- GFCI's are provided as required and checked regularly
- Showers are temperature controlled
- Hooks and benches are in good condition

## **Observation Areas**

- Seating areas are in good condition with restricted access to the pool deck

## **Sport Specific Protection**

- Adequate supervision (NL Certification)
- Inflatable devices are secure and under supervision
- Diving board nets provided
- Rope maintenance
- Sliding/diving board supervision
- Depth indicators are adequate (easily seen and in metric)
- Safety equipment is in place
- Check sauna and hot tub temperature controls

## **Pool Chemicals**

- Daily testing of the pool chemicals
- Logs are kept up to date
